SUMMARY

Computer Science undergraduate at IIIT Senapati with practical experience in full-stack web development using the MERN stack and a strong interest in Machine Learning and AI. Actively seeking internships in Full-stack Development or Machine Learning.

EDUCATION

Indian Institute of Information Technology (IIIT) Senapati Manipur, India
B.Tech in Computer Science and Engineering | CGPA: 8.94/10 Aug 2023 – May 2027 (Expected)
K.M. Public School, Bhiwani (CBSE) Bhiwani, India
Class 12th: 89.4% (2022) | Class 10th: 95% (2020)

EXPERIENCE

Centre for Development of Advanced Computing (C-DAC) Remote
Virtual Intern – Ethical Hacking and Penetration Testing Nov 2024 – Dec 2024

- Completed CyberGyan Virtual Internship in network security, vulnerability assessment, and digital forensics under mentorship of Mr. Varun Mishra.
- Executed “Audio Forensics – Matching Suspect Voice from Evidence” using spectral analysis, pitch detection, and frequency pattern matching; applied Goldwave and Audacity for voice identification.
- Implemented secure digital forensic protocols ensuring data integrity and chain of custody throughout the investigation.

PROJECTS

LearnStack | *Full-Stack Ed-Tech Platform | React.js, Node.js, MongoDB, JWT, Razorpay* | [GitHub](#) 2025

- Built scalable MERN stack application with 15+ RESTful API endpoints for course creation, consumption, and rating by students and instructors.
- Implemented secure authentication using JWT and bcrypt with OTP verification; integrated Razorpay for payments and Cloudinary for media management.
- Engineered responsive React.js frontend with Redux state management achieving 95+ Lighthouse score; deployed on Vercel and Render with MongoDB Atlas.

EpiDetect | *EEG Seizure Detection | Python, scikit-learn, Flask, Signal Processing, Ensemble ML* | [GitHub](#) 2026

- Built an epileptic seizure detection system using a 40-model multi-seed ensemble (5 seeds x 8 classifiers) on the Bonn University EEG dataset, achieving 99.40% accuracy, 99.09% precision, and 99.90% ROC-AUC.
- Engineered 720-dimensional EEG feature vector spanning spectral band powers, Hjorth parameters, DWT coefficients, and nonlinear features; applied union-based feature selection (MI union F-classif) with 10-fold stratified cross-validation to prevent data leakage.
- Implemented multi-seed averaging across 5 random seeds with fixed threshold and seizure class weighting to handle class imbalance (400 non-epileptic vs 100 epileptic), achieving only 3 misclassifications out of 500 samples.

LEADERSHIP

AI & Cloud Lead, Google Developer Groups (GDG) – IIIT Senapati Sept 2025 – Present
Leading AI and Cloud domain initiatives for 200+ students; organizing technical workshops on GCP and mentoring peers on cloud architecture, machine learning, and full-stack development best practices.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript (ES6+), PHP, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Redux, Tailwind CSS, Mongoose, JWT, Flask, scikit-learn, NumPy, Pandas, SciPy, PyWavelets, Matplotlib
Databases: MongoDB, MySQL, SQLite
Tools & Cloud: Git/GitHub, REST APIs, GCP, Vercel, Render, MongoDB Atlas, Cloudinary, Postman

CERTIFICATIONS & ACHIEVEMENTS

Getting Started with Competitive Programming – NPTEL | Jul–Oct 2025 | Score: 77%
100 Days of Code: Complete Python Pro Bootcamp – Udemy (Dr. Angela Yu) | Jan 2026
Complete Full-Stack Web Development Bootcamp – Udemy (Dr. Angela Yu) | Dec 2025
